Subject: Toxicological studies support

Dr. Scott Masten NIEHS Office of Chemical Nominations and Selection

P. O. Box 1233, MD A3-07

Research Triangle Park, NC 27709

Dear Dr. Masten:

I have just found out about the recommendation in your July 2002 NTP UPDATE for "one or more types of toxicological studies on*Hexafluorosilicic acid and Sodium hexafluoro-silicate - primary agents used to fluoridate public drinking water supplies."

I have researched water fluoridation for several years, and the Federal Governments position has always puzzled me. Hopefully this will shed some light on the subject.

Sincerely

Wayne Logbeck
